Student Project Submission

Registration for student projects opens on Feb. 5th and closes Feb. 20th.

Students who participate in this district event will be judged and Gr. 6-12 students are eligible to advance to the Regional Science Fair in Fredericton mid-March. They may enter in either of the two categories: Discovery or Innovation. A tri-fold board is required but a report is not at this level. Evidence of the process in the form of a science journal is recommended.

Maximum number of projects that can be registered from your school is 8 projects at each of the grade levels: 3-5, 6-8, 9-12.

Showcase Submission

Showcase submissions are open to K-12 students and classes to highlight some of the amazing Science and STEM learning happening in their school. These projects are not judged in the district event but students

participating have the opportunity to share their learning, participate in STEM activities, and are eligible for door prizes during the day.

Maximum of 4 students per showcase. K-5 students will need to have an adult supervisor in attendance.

Guidelines, Safety & Ethics

Visit [STEM North](#) to review all STEM Fair guidelines, resources, judging criteria, safety & ethics.
